Student Testimonials

“The textbook is very user friendly and easy to use to navigate. I thought the textbook explained the material very well and it was easy to follow if you are new to those concepts. I found the individual chapter interface and pop ups were very helpful and welcoming when you needed help. “

“I personally believe the information discussed in each chapter was formatted very well. I was able to find the topics I needed to view very easily. As for the information that explained each concept, it was fairly straightforward and inciteful.”

“I also especially like the quizzes that are at the end of sections (self-correcting questions) as they tell the answer right away to have me reflect on the question immediately instead of checking a key in the back or something as such.”
